

Ali Abasgulizada

Passport: C04006282 | **Date of birth:** 14/05/2004 | **Nationality:** Azerbaijani | **Gender:** Male | **Phone number:** (+994) 556215689 (Mobile) | **Email address:** ali.abasgulu@gmail.com | **Address:** Azerbaijan (Home)

● ABOUT ME

I am a **Python Developer** with practical experience in backend development, RESTful API design, debugging, testing, and database optimization. I am currently focused on improving my skills in **PyTorch** and expanding my knowledge of **machine learning**. My goal is to strengthen my ability to develop intelligent, data-driven applications by combining solid Python programming skills with modern machine learning techniques. More detailed information about my technical skills, projects, certificates, and experience can be found in the following sections.

● EDUCATION AND TRAINING

15/09/2021 – 31/07/2026 Baku, Azerbaijan

COMPUTER ENGINEERING National Aviation Academy

As a Computer Engineering bachelor at the National Aviation Academy, I studied a broad foundation in computing, mathematics, electronics, aviation systems, and communication. My curriculum covered **programming, object-oriented programming, data structures and algorithms, database systems, operating systems, computer architecture, networks, cloud technologies, web technologies, cybersecurity, computer graphics, digital systems, embedded systems, and machine learning**. I also learned **calculus, linear algebra**, differential equations, probability and statistics, discrete mathematics, physics, circuit theory, and electronics.

Website <https://naa.edu.az/> | **Final grade** 95.7/100 | **Level in EQF** EQF level 6

15/09/2010 – 31/07/2021 Sumgayit, Azerbaijan

HIGH SCHOOL Gubadly School No.2

Level in EQF EQF level 4

● WORK EXPERIENCE

SOFTWARE DEVELOPER – FIFTH FORCE SOLUTIONS INC – 01/06/2024 – Current – OAKVILLE, CANADA

Email: support@fifthforce.net

I am a software developer with practical experience in building, testing, and maintaining **Python-based applications**. I have strong debugging skills and can analyze code carefully to identify errors, trace their causes, and fix them efficiently. My work includes improving system performance by optimizing existing database queries and making applications faster and more reliable. I have experience creating unit tests for both new and existing Python code using the **PyTest** framework, which helps ensure code quality and reduces future defects. I also design and develop **RESTful APIs** using the **Flask** microframework, focusing on clear structure, maintainability, and practical functionality. In addition, I am comfortable troubleshooting existing Python codebases, understanding project logic, and solving technical issues in a systematic way. These skills allow me to contribute to backend development, software maintenance, testing, and performance improvement in real-world software projects. I aim to write clean, reliable, and scalable code consistently.

BACKEND DEVELOPER INTERN – NATIONAL AVIATION ACADEMY – 01/06/2024 – 01/09/2024 – BAKU, AZERBAIJAN

I am a Backend Developer Intern with hands-on experience developing web applications using Python frameworks such as **Django** and **Flask**. I have created custom backend solutions, designed server-side logic, and supported communication between application components. I also designed, implemented, and tested **RESTful APIs**, working with endpoints, request handling, and structured responses. My experience includes writing unit and integration tests to

verify functionality, improve software quality, and ensure that different parts of an application work correctly together. Through these tasks, I developed a solid understanding of backend development, debugging, clean code practices, and building reliable, maintainable software systems in Python projects.

● **SKILLS**

Python | Django | Flask | Pytorch | MySQL, SQLite, MSSQL | OOP | Problem Solving | Analytical thinking | Communication skills

● **LANGUAGE SKILLS**

Mother tongue(s): **AZERBAIJANI**
Other language(s):

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
ENGLISH	C2	C2	B2	B2	B2
TURKISH	C2	C2	C1	C1	C1

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

● **CERTIFICATIONS**

Cambridge Assessment English, 06/07/2025
International English Language Testing System (IELTS)

Test Results
• Listening: 8.5/9
• Reading: 8.5/9
• Writing: 6.5/9
• Speaking: 6.5/9
Overall Band Score: 7.5/9
CEFR level: **C1**

[Certificate](#)

Educational Testing Service (ETS), 05/10/2025
Graduate Record Examination (GRE)

Completed the GRE General Test with a strong Quantitative Reasoning score of **164**, demonstrating solid analytical, mathematical, and problem-solving skills. Also achieved **146 in Verbal Reasoning** and **2.5 in Analytical Writing**.
Total: 310/340

[Certificate](#)

National Aviation Academy, 01/10/2024
Programming Olympics - Silver Medal

Achieved **2nd place in a Programming Olympiad**, solving competitive programming problems focused on **data structures, algorithms, and problem-solving**. The competition included tasks similar to **LeetCode** and **E-olymp** challenges, requiring strong logical thinking, efficient coding, algorithm design, and optimization skills.

[Certificate](#)

Udemy Python Course

Completed a **42-hour Udemy certificate course** titled **“Python | Sıfırdan İleri Seviye Programlama”**, focused on learning Python programming from beginner to advanced level. This training strengthened my understanding of programming logic, Python syntax, problem-solving, and practical software development concepts, supporting my growth as a software developer.

● PROJECTS

Ecommerce App (Senja)

Developed and deployed a full-stack e-commerce web application using **Django**, with modules for **user management, authentication, payments, templates, static files**, and **media handling**. Implemented **registration, login, email verification, account activation**, and **password reset functionality**. Integrated *Stripe* for online payment processing and configured the project for live deployment on *PythonAnywhere*. The project demonstrates practical experience in Django backend development, payment integration, user authorization, email-based verification, form validation, static/media file configuration, and production deployment.

Article app

Developed an article management web application using **Flask** and **Python**, with backend logic implemented in `app.py` and a structured project architecture including database scripts, templates, static files, and dependency management. Designed and implemented **RESTful API functionality** for handling article-related operations and connecting the backend with web pages. Configured a **MySQL database** using SQL setup scripts and managed application dependencies through `requirements.txt`. The project demonstrates practical experience in Flask backend development, RESTful API design, database integration, server-side logic, HTML template rendering, static file organization, and building maintainable Python web applications.
